

For more than 20 years, Healing Care Groups have been a powerful resource for positioning individuals to experience the healing presence of Jesus in the context of community. These groups have been led in churches and living rooms, hospitals and prisons, counseling centers and military bases—both virtually and in person.

Over the years, Healing Care Groups have had different names and formats, but the mission has remained the same: to create a safe, Christ-centered environment where individuals can encounter Jesus and experience His healing presence.

What began as a simple three-hole-punch binder for group leaders has grown into a robust online experience that supports both facilitators and participants with teaching videos, digital workbooks, guided exercises, and additional resources.

As Healing Care Groups have continued to grow and evolve, we have recognized the need for the way we deliver these resources to evolve as well. We want the format to better reflect what participants and facilitators are actually receiving—not simply a workbook or leader guide, but a comprehensive collection of resources designed to support the entire Healing Care Group experience.

### *What's Changing?*

#### New Lower Pricing

We are excited to announce that we are lowering the price of both the Healing Care Group Leader Platform and Participant Portal.

Healing Care Group Leader Platform: \$199

Healing Care Group Participant Portal: \$75

#### New Digital Workbook Format

The leader and participant workbooks will now be available in a flexible digital format, allowing individuals to download them to a digital device or print them in the way that works best for them:

Complete workbook

Individual chapters

Interactive/exercise pages only

Full-color or grayscale versions

This gives leaders and participants the flexibility to use the workbooks in the way that works best for them—whether printing the entire workbook, printing only the pages needed for a particular session, or primarily using the materials digitally.

This change also ensures that leaders and participants receive workbook revisions and updates more quickly and efficiently.

### *When Will These Changes Take Effect?*

Healing Care Groups will continue to be offered in the current format and at the current price through October 31st. Beginning November 1st, we will move to the new pricing and digital format for the Leader Platform and Participant Portal.

If you have purchased the Healing Care Group Leader Curriculum in the past, no additional purchase is required. Your existing login credentials will give you access to the Leader Platform and any new features and resources we add.

### *A More Streamlined Experience*

Moving these materials into the Healing Care Group Experience Portal allows us to simplify and expedite delivery while giving facilitators and participants immediate access to everything they need in one place.

Our desire is not simply to change how Healing Care Group materials are delivered. It is to create a more accessible, affordable, and sustainable experience while preserving what has always been at the heart of Healing Care Groups: creating space for people to encounter the healing presence of Jesus in community.

We are excited about this next step and grateful for the facilitators and participants who have carried the ministry of Healing Care Groups into communities around the world.

Grace & Peace,

Healing Care Ministries
